Summary

I am Ruiwen Zhou, a third-year undergraduate student in SEIEE, Shanghai Jiao Tong University. I am now pursuing the bachelor's degree at the department of electronic engineering, and I also minor in computer science and technology. My research mainly focuses on topics related to machine learning, especially imitation learning and single-agent reinforcement learning.

I always feel excited and highly-motivated about the theory and application of machine learning, and I actively participate in relevant projects and discussions. I also have decent English listening and writing skill. My major weaknesses are that I am a little introverted and sometimes not very confident about myself, but I am always trying to overcome them and becoming better.
